

Computer Literacy Tutorial of the Week

Create Your Own AI-Generated Art – No Coding Required!

Explore your creativity using artificial intelligence

If you can type it, AI can paint it.

What Is This All About?

- Turn simple text prompts into stunning visuals
- Use free online tools—no coding needed
- Great for fun, school, or professional use

Perfect For:

- Social media posts
- Art inspiration
- Digital projects and presentations

Why It's Exciting

Why You'll Love This:

- Tap into the same AI tech used by OpenAI and Adobe
- Combines art and innovation
- See instant results—create something unique in minutes

Did You Know?

Your smartwatch is more powerful than the computers used during the Apollo missions—now it can help you make art!

Learn and Create

You Will Learn:

- What powers AI art tools (explained simply)
- How to use platforms like Craiyon, Wombo, DALL·E, and more
- Tips for writing powerful image prompts
- How artists use AI in the real world

Challenge Prompt:

Reimagine your hometown as either a futuristic cyberpunk city or a medieval fantasy kingdom. Share your image and the prompt you used!

Try It Yourself!

Recommended Free Tools:

- Craiyon: <https://www.craiyon.com>
- Dream by Wombo: <https://www.wombo.art>
- Microsoft Designer: <https://designer.microsoft.com>
- DALL·E by OpenAI: <https://openai.com/dall-e>

Final Thoughts:

- AI art is fun, fast, and free to explore
- No tech experience necessary
- Let your imagination be your guide!

Get started today and make your first AI-generated masterpiece!
